# **Air Monitoring Summary Tables**

The table below summarizes monitoring data collected using a portable wireless remote monitoring system. All times in Easter Standard Time (EST).

## *From*: 12/9/21 12:00 am *To*: 12/9/21 11:59 pm

**Offsite Monitors** 

	Reached?	Range Detected <sup>a</sup>	24-hr Average <sup>a</sup>	Average	14-day MRL

<sup>a,b</sup> Based on 30-minute averages for the above 24-hr reporting period, unless otherwise noted.

#### Notes:

ATSDR MRL AEGL	Agency for Toxic Substances and Disease Registry Minimal Risk Level (MRL) EPA Acute Exposure Guidelines Levels
$H_2S$	Hydrogen Sulfide
TAPI	Teledyne API H <sub>2</sub> S Analyzer
hr	Hour
min	Minute
ppb	Parts per billion
MRL Limit	Limit defined as a 14-day average value.

### Wind rose – Shows the direction the wind is coming from, the monitoring station being at the center of the rose.

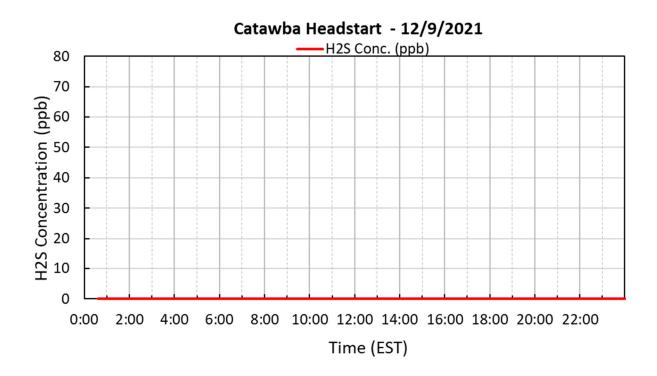

# Period H<sub>2</sub>S Monitoring Hydrogen Sulfide Offsite Monitors

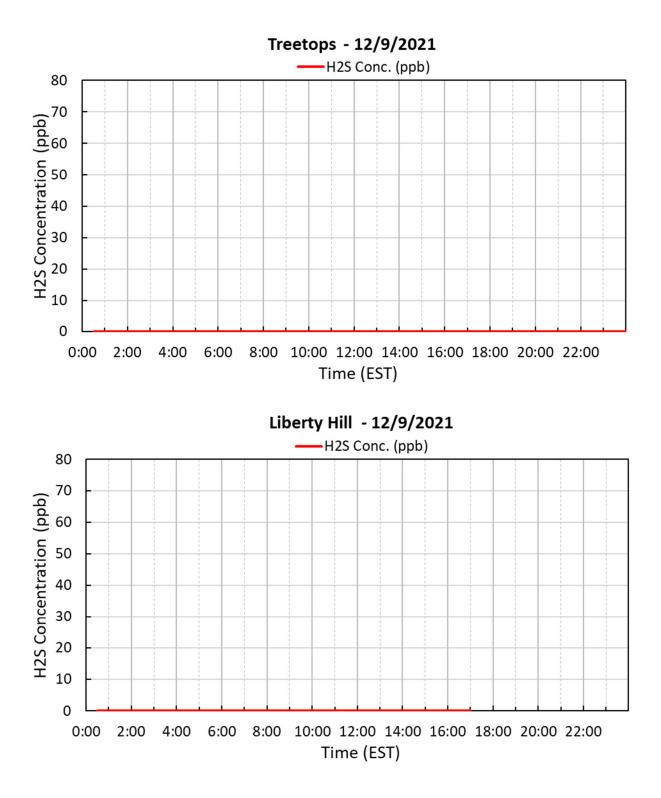

Below are graphs for offsite locations where hydrogen sulfide (H<sub>2</sub>S) was detected during the current reporting period.

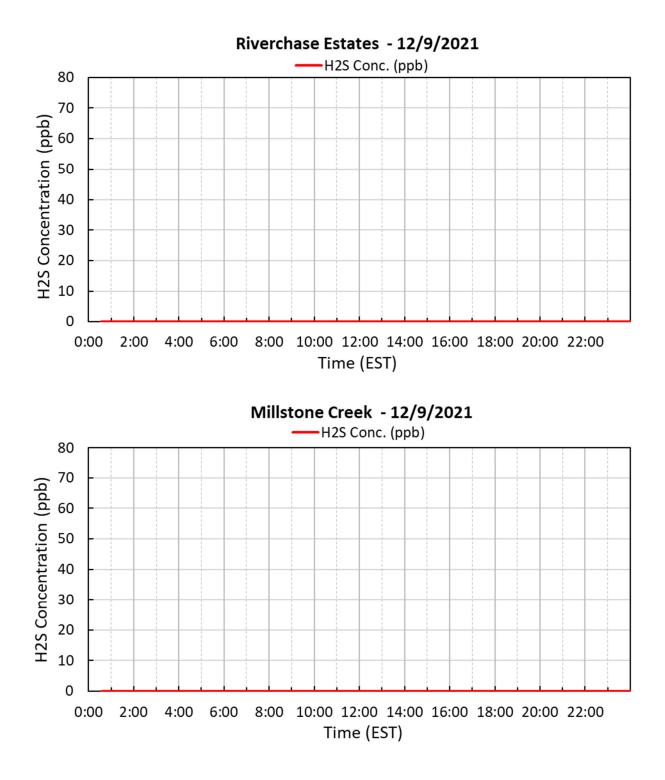

The five stand-alone H<sub>2</sub>S monitoring stations correlate with five previous EPA's Viper monitoring system which includes areas to the north-northeast and south-southwest of the New-Indy Catawba Mill.

Winds were variable through the day from the northeast to south-southeast at 2 to 6 miles per hour.

See wind rose diagram with aerial map figure for full wind data during this reporting period.

## Period H<sub>2</sub>S Monitoring Hydrogen Sulfide Onsite Monitors

Below are graphs for onsite locations during the current reporting period.

Depending on wind direction, the H<sub>2</sub>S measured at the onsite fence line locations may not exit mill property at reported concentrations. Wind directions from offsite locations, blowing onto mill property, will disperse ambient concentrations to lower levels prior to exiting the plant site.

Winds were variable through the day from the northeast to south-southeast at 2 to 6 miles per hour See wind rose diagram with aerial map figure for full wind data during this reporting period.
