# Air Monitoring Summary Tables

The table below summarizes monitoring data collected using the $H_2S$ analyzers deployed at the onsite stations.
All times in Eastern Standard Time (EST).

Below are graphs for onsite locations during the current reporting period.

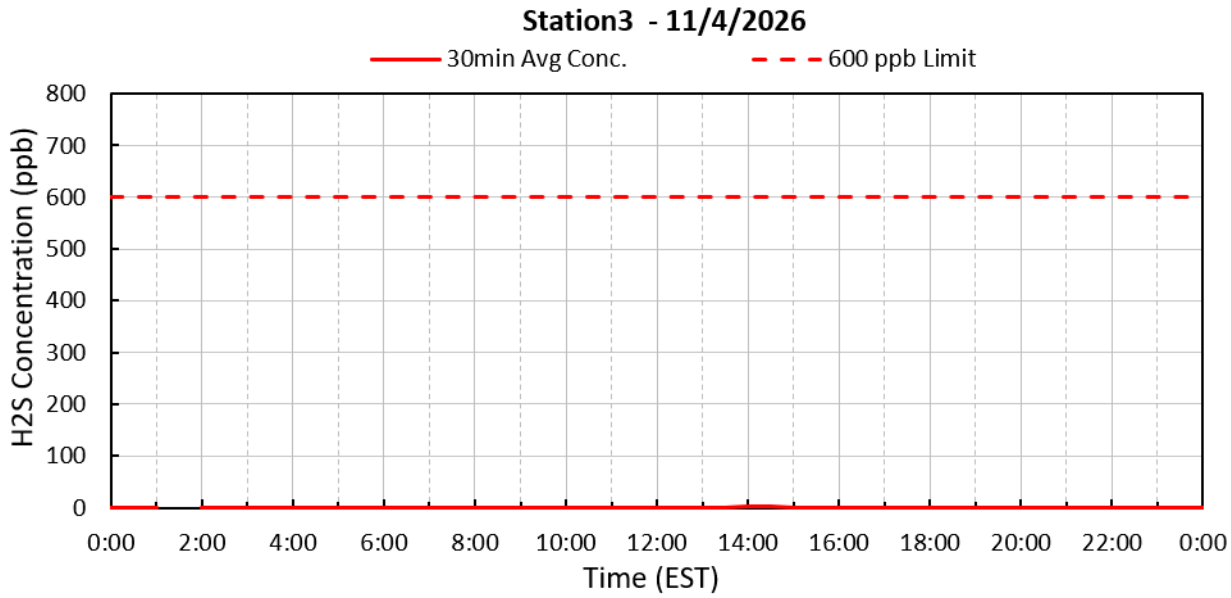

Depending on wind direction, the $H_2S$ measured at the onsite fence line locations may not exit the mill property at reported concentrations. Wind directions from offsite locations, blowing onto mill property, will disperse ambient concentrations to lower levels prior to exiting the plant site.

Winds were coming from a variable direction throughout the day at 1 to 5 mph.

See wind rose diagram with an aerial map figure for full wind data during this reporting period.
